# Then&Now

Anthony Chow

———

DES 157B Winter 2022

What advice would you give yourself from the last five years?

Initial Brainstorming: Mindmap
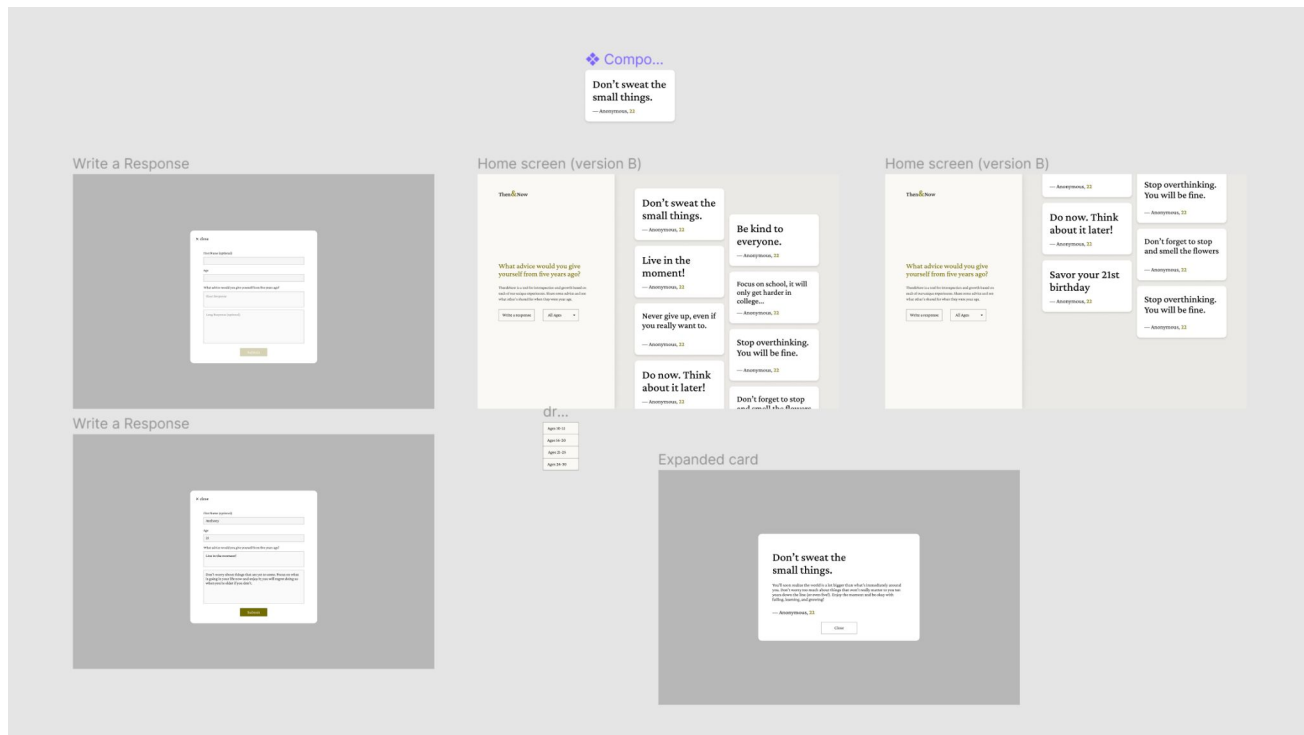

Storyboarding

Curiosity ⇌ Reflection

Interactive Design Comp

Iteration: Version 1

- Initial title & description
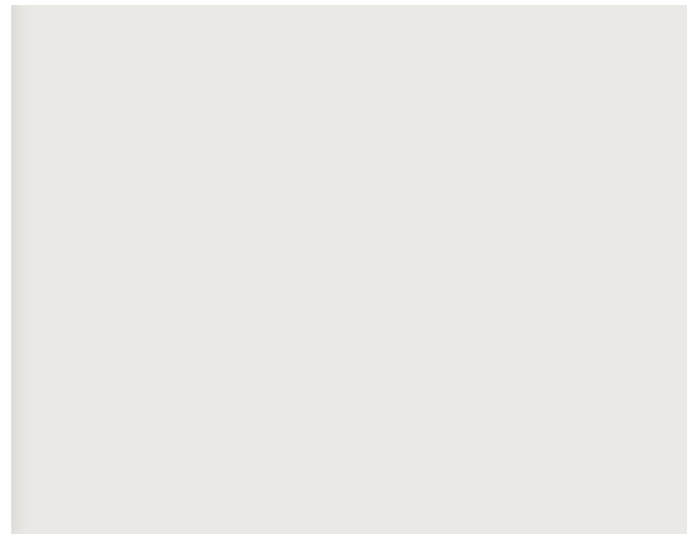

- No functionality just yet

Then&Now

What advice would you give yourself from a year ago?

Then&Now is a tool for introspection and growth based on each of our unique experiences. Share some advice and see what other's have shared for when they were your age.

| Write a response | Ages 10-15 ▾ |

Iteration: Version 2

- Initial sets of cards added from friends

- Connection to Back4App

- Functionality added to add cards and filter cards

- Implemented Typed.js + aos.js

Then&Now

What advice would you give yourself from five years ago?|

Then&Now is a tool for introspection and growth based on each of our unique experiences. Share some advice and see what other's have shared for when they were your age.

Write a response   All Ages ▾

"Develop good habits!"
— Anthony, 19

"Live in the moment - don't worry about the future because what's meant to be will be!"
— Kiara, 20

"Focus on yourself"
— Jared, 19

Iteration: Version 3

- Hover state for cards

- Improved breakpoints for smaller displays

- Auto-scroll to card once created

Then&Now

Then&Now is a tool for introspection and growth based on each of our unique experiences. Share some advice and see what other's have shared for when they were your age.
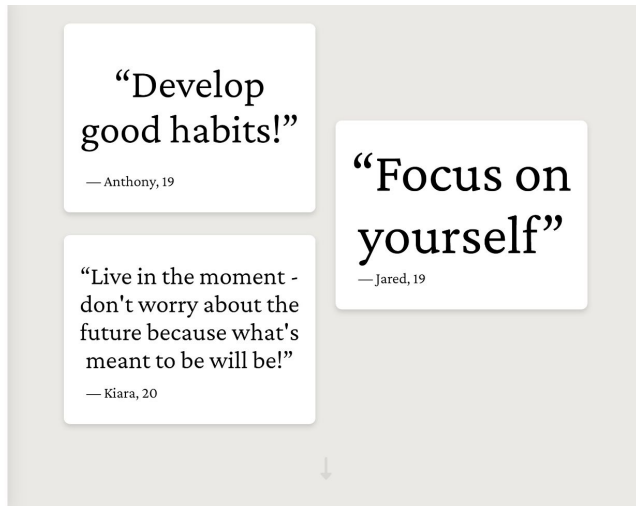

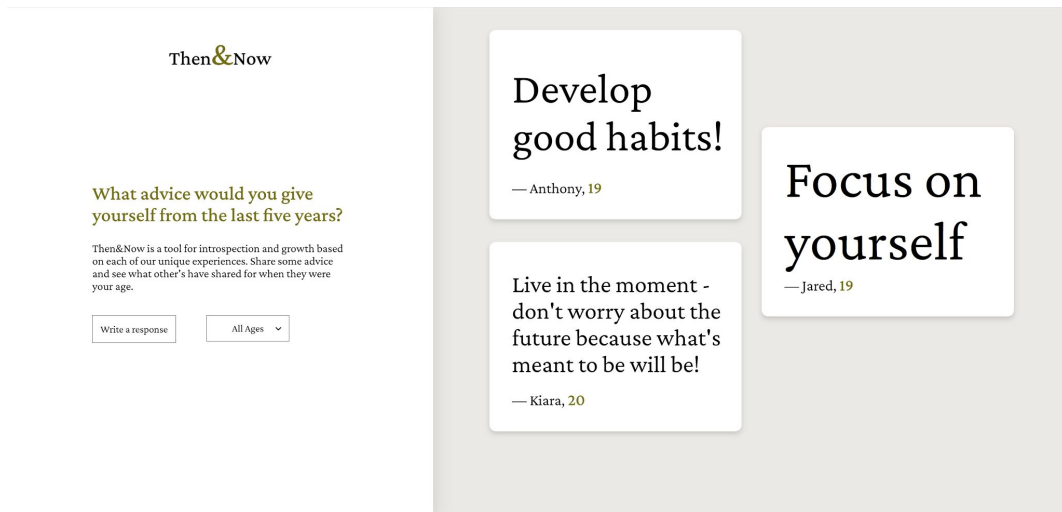

Write a response   All Ages ⌄

Develop good habits!

— Anthony, 19

Live in the moment - don't worry about the future because what's meant to be will be!

— Kiara, 20

Focus on yourself

— Jared, 19

Biggest Challenges

- Dynamically adding card elements to the DOM

- Using callback functions to make sure things happen in the order I need it to

- Maintaining the CSS layout of the cards while working with breakpoints

- Dynamically adjusting the font size based on content length for each card
